

Error Code E90 - No water flow

Sarah Tichler - 2019-04-04 - 0 Comments - in Whirlpools

Ensure the outlet cover grid is clean and free from obstructions.

Clean or replace the cartridge, see Maintenance and Storage section.

Ensure the in/outlet connections on the spa tub and filter pump and filter pump are not blocked.

Be sure to properly sanitize the spa water to keep the filter cartridge clean and not clogged.
